Magit Reference Card

Getting Help in Emacs

`C-h k` `<key>`	describe function bound to `<key>`
`C-h b`	list the key–bindings for the current focus buffer
`C-h m`	describe mode
`C-h l`	show the keys you have pressed
`<prefix> C-h`	show all key–bindings beginning with `<prefix>`

Section Movement

`p`	previous section
`n`	next section
`P`	previous sibling section
`N`	next sibling section
`^`	parent section

Staging

`s`	stage change at point
`u`	unstage change at point
`S`	stage all changes in worktree
`U`	reset index to some commit
`M-x magit-unstage-all`	remove all changes
`M-x magit-stage-file`	stage current file
`M-x magit-unstage-file`	unstage current file

Section Visibility

`TAB`	toggle visibility of current section
`C-TAB`	cycle visibility of section and children
`M-TAB`	cycle visibility of diff–related sections
`S-TAB`	cycle visibility of all sections in buffer

Popups

`!`	running git	`m`	merging
`b`	branching	`M`	remoting
`B`	bisecting	`P`	pushing
`c`	committing	`o`	submoduling
`d`	diffing	`r`	rebasing
`E`	ediff	`w`	apply patches
`f`	fetching	`W`	format patches
`F`	pulling	`t`	tagging
`l`	logging	`z`	stashing

Status/Diff/Log Buffer

`SPC`	update commit/diff buffer or scroll up
`DEL`	update commit/diff buffer or scroll down
`h`	show dispatch popup
`g`	refresh
`G`	refresh all
`q`	bury current buffer
`L`	toggle margin
`x`	soft reset (hard when argument is given)
`y`	show references (tags and branches)
`Y`	cherry
`C-c C-b`	move backward in buffer's history
`C-c C-f`	move forward in buffer's history
`e`	ediff DWIM
`i`	gitignore
`I`	gitignore locally

Diff Buffer

`RET`	visit file (or blob) at appropriate position
`C-RET`	visit file at appropriate position
`-`	decrease context of diff hunks
`+`	increase context of diff hunks
`0`	reset context of diff hunks to default height
`j`	jump to diff stat ↔ diff section

Log Buffer

`+`	show more history
`C-c C-c`	select commit at point and act on it
`C-c C-k`	abort selecting commit

References Buffer

`y`	compare references with HEAD
`c`	compare references with current branch
`o`	compare references with other branch

Blaming

`M-x magit-blame`	display edit history of file
`RET`	show the commit at point
`SPC`	update commit/diff buffer or scroll up
`DEL`	update commit/diff buffer or scroll down
`n`	move to the next chunk
`N`	move to the next chunk (same commit)
`p`	move to the previous chunk
`P`	move to the previous chunk (same commit)
`q`	turn of magit blame mode
`t`	show or hide blame chunk headings

Repository Setup

`M-x magit-init`	initialize a Git repository
`M-x magit-clone`	clone a repository
